

IT2130 – Operating Systems and System Administration

Practical Sheet 11

Activity 1

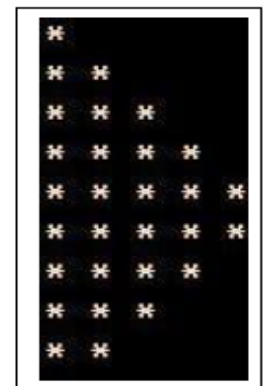

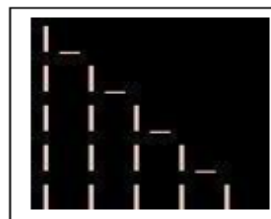

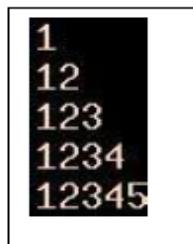

Write a menu driven shell script to perform the following tasks.

- [1] Show Today's date/time
- [2] Show files in current directory
- [3] Show calendar
- [4] Start editor to write letters
- [5] Exit/Stop

It will execute repeatedly until user selects exit (option 5) from the menu.

Activity 2

Write shell scripts to display the following patterns.

Activity 3

Write Script to find out biggest number from given three numbers. Numbers are supplies as command line argument. Print error if sufficient arguments are not supplied.

Activity 4

Write a function for bash shell to display the day, time, login and current directory.
